PUBLIC WORKS SECRETARIAT.

No. P. W. 13-19—K. S. S. 114-120, dated 8th July 1924.

In pursuance of the programme of works sanctioned for the Krishnarajasagara Dam Works during the current year in G. O. No. 208-18—K. S. S. 1418-28, dated the 31st December 1923, the work of constructing a sluice, 6' x 8' at +60 level of the Reservoir at the entrance to the tunnel feeding the Right Bank Low Level Canal has to be taken up and completed during the next summer months. Although according to G. O. No. 1218-26—7805-13, dated 13th September 1913 the channels have to be closed on 10th January, it has been the practice to allow water during the last few years for several days even after 10th January in the Right Bank Low Level Canal from the Reservoir, but such a concession will not be possible during the current year beyond 20th January for the reasons stated above. Further, no hot weather supplies can be allowed in the channel during the next summer for any lands under it. Those owning lands under this channel are therefore requested to note the above and arrange for early sowing and harvesting.

All officers of Government concerned are requested to take such action as may be necessary to speed up agricultural operations by the 20th January 1925 and not to allow cultivation of any crop requiring hot weather supplies during the summer of 1925.
